Total Debt	157,000.00	148,000.00	140,000.00

Management Discussion & Analysis

The operating model benefits from long-term PPAs, sovereign linkage perception, and predictable cash flows, partly offset by a capex-heavy transition agenda. Market backdrop is supported by signals such as NTPC Power achieves 70 GW installed capacity milestone; green portfolio at 18 GW. NTPC Limited, formerly known as National Thermal Power Corporation, is an Indian central Public Sector Undertaking (PSU) owned by the Ministry of Power and the Government of India, which is engaged in the generation of electricity and other activities. The headquarters of the PSU are situated at New Delhi. NTPC's core function is the generation and distribution of electricity to State Electricity Boards in India. The body also undertakes consultancy and turnkey project contracts that involve engineering, project management, construction management, and operation and management of power plants.

Key Risk Factors

- Execution risk on renewable capacity addition
- Receivable concentration with state discoms
- Fuel-cost and policy transitions
